DATA ANALYST & BUSINESS IT SPECIALIST

PERSONAL PROFILE

Detail-oriented Business Information Technology professional with a strong foundation in data engineering, predictive modeling, and system architecture. Skilled in transforming complex datasets into actionable business insights and strategic recommendations using modern analytics tools and cloud platforms. Experienced in executing exploratory data analysis (EDA), risk profiling, and database management within enterprise IT environments. Demonstrates a continuous learning mindset with a long-term focus on data-driven optimization, system scalability, and operational efficiency.

KEY SKILLS

- Data Analytics & Visualization
- Exploratory Data Analysis (EDA)
- Predictive Modeling & Risk Profiling
- Database Management Systems (DBMS)
- Enterprise ICT User Support
- Cloud Computing (GCP)
- System Simulation & Modeling
- Technical Documentation & Reporting
- Data Cleaning & Quality Assurance
- Agile & Collaborative Teamwork

TECHNICAL TOOLS

Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib), SQL, C++, HTML, CSS

Frameworks & Deployment: Django, FastAPI, Streamlit

BI & Visualization Tools: Microsoft Power BI, Tableau, Advanced Microsoft Excel, Jupyter Notebook

Cloud & Platforms: Google Cloud Platform (GCP)

PROFESSIONAL EXPERIENCE

ICT Intern

Kenyatta National Hospital (KNH) - May 2025 - August 2025

- Assisted in day-to-day ICT operations and provided reliable technical user support across a massive enterprise healthcare IT environment.
- Managed system documentation and troubleshooting procedures, improving operational uptime for internal staff.
- Gained hands-on exposure to network management, enterprise resource planning (ERP) support, and data privacy protocols.

PROJECT EXPERIENCE

Factory Facility Equipment Maintenance Management System (TINDI CMMS)

Academic Capstone Project — April 2026

- Designed and architected a full-stack network-deployed Computerized Maintenance Management System (CMMS) targeted at a Coca-Cola bottling facility.
- Integrated a smart technician assignment module and an automated preventive maintenance (PM) engine to reduce Mean Time to Repair (MTTR) and boost Overall Equipment Effectiveness (OEE).

AI-Driven Collections Strategy & Risk Profiling

Data Science Project — June 2025

- Executed comprehensive exploratory data analysis (EDA) and established risk-profiling frameworks to handle financial data.
- Built delinquency prediction models combined with strategic business reporting to optimize collection strategies.

Data Analytics & Visualization Job Simulation

Accenture (via Forage) May 2025

- Completed an intensive virtual experience focusing on data cleaning, conceptual data modeling, and visualization dashboard creation.

- Synthesized raw data points into clear data stories, simulating professional corporate analytical consulting.

Business Performance Analysis

Awesome Chocolate (New Zealand Data Case Study) — May 2024 – June 2024

- Extracted and cleaned multi-channel business metrics to evaluate regional performance and revenue structures.
- Developed dynamic Power BI and Advanced Excel dashboards to visually communicate supply chain and sales insights.

EDUCATION

- **2022–2026:** BSc in Business Information Technology. Multimedia University of Kenya. (Graduating October 2026).
    - *Relevant Coursework:* Probability & Statistics, Data Structures & Algorithms, DBMS, Simulation & Modeling, Networks, Artificial Intelligence.

ADDITIONAL INFORMATION

- Strong analytical, problem-solving, and decision-making skills.
- Experience working within fast-paced enterprise IT environments.
- Solid understanding of relational database structures and cloud data pipelines.
- Excellent written, verbal, and technical presentation skills.

REFEREES

Available upon request.
